**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U. S. C. 121:
  - I. Claims 1-17, drawn to a method of inhibiting a protein-protein interaction by identifying a first sequence of a first protein that binds to a second protein, wherein the first sequence has 3-10 amino acid consecutive amino acids, providing a peptide agent containing a peptide in amide form having a sequence identical to the first sequence, and contacting the peptide agent with the second protein to inhibit the protein-protein interaction, classified in class 514, subclasses 18 and 15, and class 435, subclass 7.1.
  - II. Claims 18-24, drawn to a method of making a pharmaceutical comprising identifying a first sequence of a first protein that binds to a second protein, wherein the first sequence has 3-10 amino acid consecutive amino acids, and providing a peptide agent containing a peptide in amide form having a sequence identical to the first sequence, classified in class 514, subclasses 18 and 15.
2. The inventions are distinct, each from the other because of the following reasons:

The methods of Inventions I and II are distinct from each other because the method steps, the material used, and the outcome of the process are wholly different between these two inventions, e.g., claims of Group I are directed to using the identified peptide agent to inhibit the protein-protein interaction, while claims of group II are directed to making a pharmaceutical comprising the identified peptide agent.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter, and because Inventions I-II require different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Eric Furman on February 24, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.
